

Tiago Gabriel Pereira

About Me

I'm a 22-year-old Developer from Porto, Portugal, passionate about creating innovative solutions. With years of work experience and a broad skill set, I am driven by my goal of contributing to impactful projects and grow alongside a talented team.

Work Experience

Butcher's Assistant - São Lázaro Butchery 2019 - 2020

Assisting in meat preparation, customer service, and maintaining cleanliness and inventory.

Cashier - Continente 2021 - 2022

Handled transactions efficiently and ensured a positive experience for customers.

Insider - Domino's Pizza 2023 - 2024

Food preparation, inventory management, cleaning and organization of the establishment.

Data Scientist Internship - Mog Technologies 2024

Worked with Vizzi's (streaming service) content traffic data to implement Green Streaming.

- Worked on extraction of data, cleaning and modeling.
- Analyzed data to discover business critical key points like consumer geography, consumer device preference, consumer internet quality, consumer watch time, etc...
- Created measures that reduced up to 15% expenditure in server side storage space and subsequent energy expenditure.
- Created a machine learning model that predicts a consumer's most used resolution during streaming sessions.
- Used Python, Pandas, Matplotlib, Plotly, Scikit-learn, Statistical Analysis and Machine Learning.

Education

Bachelor in Technologies and Information Systems for Web (TSIW) - 2021 - 2025

Escola Superior de Media Artes e Design

Enrolled on a bachelor degree focused on Web and Mobile Fullstack Development, DevOps and UI/UX Design.

Information Systems Management and Programming Technician - 2018 - 2021

Escola Profissional Ruiz Costa

Enrolled on a professional course dedicated to IT (Computer & Software Maintenance, Network Management, Security Management), Programming and Database Management.

Projects

MediMetrics - TSIW course 2024 - 3rd Year Project

Developed an API to help healthcare institutions manage patients. It enables real-time tracking of vital signs and optimizes patient vacancy coordination.

- Used GraphQL, MongoDB, WebSockets.

AllerGenius - TSIW course 2023 - 2nd Year Project

Designed and developed an app for people with food allergies to search for allergenic elements on food products, simplifying the process through barcode scanning and allergen detection via product description photos.

- Used Figma, React Native, Google Cloud Vision API, REST, Express.js, JWT and MySQL.

Hobbies & Interests

- Data Science - Passionate about learning machine learning through personal projects.
- Kickboxing & Muay Thai - Dedicated to training, focusing on discipline, and resilience.
