

Tiago Gabriel Pereira

About Me

I'm a young Full-Stack Developer from Porto, Portugal. I'm looking for a project where I can contribute to building innovative solutions. I'm also planning to continue my studies with a Master's in Machine Learning to keep improving my skills.

Work Experience

Data Scientist Internship - Mog Technologies 2024

Worked with Vizzi's (streaming service) content traffic data to implement Green Streaming.

- Data extraction, cleaning and modeling (InfluxDB, Pandas, Numpy)
- Analysis of data to discover business critical key points like consumer geography, consumer device preference, consumer internet quality, consumer watch time, etc... (Matplotlib, Seaborn, Plotly)
- Creation of measures that reduced up to 15% expenditure in server side storage space and subsequent energy expenditure.
- Creation of Machine Learning Model (Supervised Classification Model) that predicts a consumer's most used resolution during streaming sessions. (Scikit-Learn)

Projects

MediMetrics - TSIW course 2024 - 3rd Year Project

Backend API for patient management in health institutions, enabling real-time monitoring of patients' vital signs and managing patient vacancies.

- API Interface - GraphQL (Queries, Mutations and Subscriptions)
- Database - MongoDB

AllerGenius - TSIW course 2023 - 2nd Year Project

An app designed for people with food allergies to search for products that contain allergens, simplifying the process through barcode scanning and allergen detection via product description photos.

- Visual identity creation and prototyping (UI/UX).
- Mobile App with React Native and barcode reader module (Frontend).
- Integration of Google Cloud Vision API for extracting words from images.
- Backend API - Express, Sequelize ORM and MySQL (store data about users allergies, allergy levels, products and the product's allergens, barcode product search, allergen keyword processing).

Education

Technologies and Information Systems for Web (TSIW) - 2021 - 2025 Escola Superior de Media Artes e Design

- UI / UX - UX oriented thinking, UI DFIGMA
- Frontend - JavaScript, HTML, CSS, Vue, React
- Backend - NodeJS, Express, GraphQL, MongoDB, MySQL
- Dev Ops - Docker, Git, Gitlab, Github

Information Systems Management and Programming Technician - 2018 - 2021 Escola Profissional Ruiz Costa

- Programming Languages - C, C#, PHP, JavaScript
- Database Management - SqlServer
- IT - Computer & Software Maintenance, Network Management, Security Management

Location

Porto, Portugal

Languages

Portuguese (Native), English

Skills

Backend

TypeScript
Express
MySQL
MongoDB
GraphQL

Frontend

React
React Native
Next.js
Vue.js

Data Science

Python
Matplotlib
Scikit-learn
Supervised Learning
Statistical Analysis

Soft Skills

- Team Player
- Proactivity
- Adaptability
- Critical Thinking
- Pragmatic
